

# Snakes & Ladders

## What do I need?

- Get a character piece or any small piece or object that will represent the players.
- A real dice or a virtual dice (scan the QR code on the right with your phone)

## How to play?

- Move the character piece depending on the count given by the dice
- When landing on a space, answer the question with the same number on the blog. If you answer correctly you stay there, if you don't, you go back two squares from the square you landed on.
- If the piece lands at the bottom of a ladder the chess piece will move up only if you answer correctly at the question at the bottom. Otherwise you go back two squares. You don't have to answer the question at the top.
- If the piece lands at the head of a snake the piece should move down.
